9 December 2020

Dear Parents of children in Year 6MQ,

Single case of COVID 19 in a school: advice to parents or carers

We have been advised that there have been two separate confirmed cases of COVID-19 within the school.

We have undertaken a full risk assessment with public health authorities. We are continuing to monitor the situation and are working closely with Public Health England. We believe all necessary precautions have been taken to limit further transmission.

Your child has NOT been identified as a close contact of the cases and they do not need to self-isolate.

A 'contact' is a person who has been close to someone who has tested positive for COVID-19 anytime from 2 days before the person was symptomatic up to 10 days from onset of symptoms (this is when they are infectious to others).

This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

School remains open apart from two class bubbles which have been closed. Those bubbles classes have been written to separately. Providing your child remains well, they can continue to attend school as normal. We will keep this under review.

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they should get a test and remain at home for at least 10 days from the date when their symptoms appeared.

All other household members who remain well must stay at home and not leave the house for 14 days, unless the test result is negative.

Please inform the school of any symptoms and test results

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or

picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child or anyone in the household does develop symptoms, you can seek advice from NHS 111 at: <https://www.nhs.uk/conditions/coronavirus-covid-19/symptoms/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19.

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

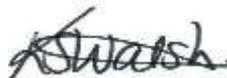

Further information is available at:
